Learning at Home
Friday 13th November
Tasks for this week, due in Thursday 19th November

Maths
A 3-digit multiple of 10 can be represented as a multiplication equation.
Example: 240 = 24 × 10
This means 24 groups of 10 make 240.

130 = _____ × 10
350 = _____ × 10
420= ____ × 10
670 = _____ × 10
890 = _____ × 10

Choose three of the numbers below.

160 · 280 · 540 · 710 · 930

For each number:
Write it as a multiplication equation.
Draw a picture or use groups of tens to show how you know.
Explain your thinking in a sentence.

Challenge yourself!
Can you solve these?

- I am a 3-digit number. I am 36 groups of 10. What number am I?
- I am 740. Write me as a multiplication equation in two different ways.
- Make up your own 3-digit multiple of 10 and write the multiplication equation to match it.

English
Use the descriptive devices that we have been practising in class to create a poster for our Success Zone display. Tell us about something you are proud of. We will send paper home for this to be completed on.

Spelling
Please learn to read and spell these words: **away, can't, more, began, say**

Reading
Please tell us what you enjoy reading at home. Record this below.

DT
We will be starting to sew our foraging bags soon. Please can you send in an old t shirt (and possibly a spare for the children to practise on if you have one). These will be returned transformed, upcycled and splendid by the end of the term!

Parent Comment – how did your child do?
